Art Unit: 1743

The referenced cited by applicants in the IDS and listed on the numerous 1449's have been made of record. While the statements filed clearly do not comply with the guidelines set forth in MPEP 2004 regarding both the number of references cited and the elimination of clearly irrelevant art and marginally cumulative information, compliance with these guidelines is not mandatory. Furthermore, 37 CFR 1.97 and 1.98 do not require that the information be material, rather they allow for submission of information regardless of its pertinence to the claimed invention. Also, there is no requirement to explain the materiality of the submitted references, however, the cloaking of a clearly relevant reference by inclusion in a long list of citations may not comply with Applicant's duty of disclosure, see Penn Yan Boats, inc. V. Sea Lark boats Inc., 359 F. Supp. 948, aff'd 479 F. 2d. 1338. 7.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 72, 77, 80-85, 87, 89-91 and 98-99 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller et al. in view of Mazza et al.

Miller et al. teach a method of immunochemical staining using an evaporation inhibitor over the sample. Column 2 lines 17+ teach application of a sample to a slide and the subsequent addition of an evaporation inhibitor. This has been read on the claimed steps of dispensing a sample and reagent. The sample reagent mixture is covered by an evaporation inhibiting liquid that has been read on the claimed evaporation inhibiting liquid. Miller et al. is silent to the claimed application of at least one stream of air to the surface to facilitate mixing.

See the appropriate paragraph of paper 9 for the teachings of Swope et al.

Specifically, Mazza et al. teach it is desirable to mix a sample with a jet of air to prevent splashing of the sample that would waste sample and contaminate the lab (exemplary of this teaching is the abstract).

Art Unit: 1743

It would have been within the skill of the art to modify Miller et al. in view of Mazza et al. and use an air jet to mix the sample to gain the above advantages.

Response to Arguments

Applicant's arguments with respect to claims 72, 77, 80-85, 87, 89-91 and 98-99 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on 9/24/03 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609(B)(2)(i). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
